Balavigna, a vertically integrated textile manufacturing and distributing company with an international and domestic presence - well known for high quality woven fabrics and now expanded its production capability to produce complete range of Home Textiles Products - Beautiful Bed, Bath, Table, Kitchen and Institutional Linens.

We manufacture 100% cotton, Poly/cotton, Linen/cotton. Our products include solid & yarn dyes in jacquards, dobby's apart from the regular percale and satin (120 TC to 600TC).

Our main range of product line includes:

- Sheets
- Pillow cases
- Shams
- Duvets
- Quilted Bed Spreads
- Cushions
- Towels
- Protectors
- Decorative pillow cases / Shams.
- Bed Skirts / Valances
- Throws
- Soft cotton blankets

Perfect Bed...

100% cotton is a breathable fabric and as such, has the ability to transfer moisture away from the skin.

Cotton sheets feel cool to the touch on summer yet will provide you warmth on winter.

Being a hypo allergenic fabric, it is ideal for those prone to allergies or skin irritations.

Using 100% cotton bedding sheet means that your bed sheets will withstand years of washing.

100% Cotton Bed Linen

COOLMAX® fabric has proven moisture management benefits that, depending on your needs, can be applied to or found in a whole new range of bedding varieties - from moderate and high-intensity performance bedding material to everyday casual wear.

Natural bamboo fiber textile is extracted directly from bamboo culms, and completely different from bamboo viscose, which is produced by chemical processing.

The fiber does not contain any chemical additives. It has unique antibacterial, deodorant, coloration, elasticity, drapability and wearability characteristics. Because of its special structure and natural "hollowness" in the horizontal cross sections, the abundant gaps in the fiber can absorb and evaporate the moisture of human skin instantly.

Soybean fibers are sustainable and don't need chemicals to grow effectively. Soybean is a renewable resource and the Soy Protein Fiber (SPF) is made using by products of the soybean industry.

Cashmere feel: The fabric made of Soybean Protein Fiber is soft, smooth, light. It has cashmere feel, but smoother than cashmere; it is as comfortable to the skin as human's second skin.

Dry and comfortable: The moisture absorption of bean fiber is similar to that of cotton fiber, but its ventilation is more superior to of cotton.

Luxurious appearance: Soybean Protein Fiber fabric has joyful silky luster with perfect drape and elegant; fabrics of yarn in high count has fine and clear texture and is classical shirting.

As the Linen fiber is a natural vegetable fibers it has huge amount of Air Porosity hole. Gives same comfort like Cotton but the strength of Linen fiber is twice than the Cotton fiber. You can not only wash the bedding linen but also clean the lien bedding linen by drying. Linen is a crisp fiber which has distinctive outlook and feel. The absorbency of Linen fiber is quite good and this is why linen can be dyed well. Along with the optimum efficiency in dyeing, one can easily print the Linen cloth except any kind of problems like print paste saturation, discolored surface etc.

100% Ecoliptus Tencel Bed Linen

Tencel fabric is an amazing eco friendly fabric that represents a milestone in the development of environmentally sustainable textiles. Tencel is a natural, man made fibre which is also referred to as lyocell. Made with wood pulp from sustainable tree farms, tencel textiles are created though the use of nanotechnology in an award-winning closed-loop process that recovers or decomposes all solvents and emissions.

100% Modal Bed Linen

Lenzing Modal® is produced from indigenous beech wood and thus it is 100% natural. Pulp and fiber production both employ the principle of sustainability. Lenzing produces the pulp used for fiber production which gives it control over the entire production process. This is unique within the fiber industry.

Cotton Thermolite Bed Linen

INVISTA's THERMOLITE® fabric and insulation provides warmth without weight. Because it is comfortable and lightweight, THERMOLITE® fabric and insulation allows freedom of movement-making it the perfect layer. Its hollow-core fibers trap in air for greater insulation for light, yet heavy-duty performance.

In a coat made with THERMOLITE® fabric and insulation, you will stay warm and dry. Its larger surface area allows for fast evaporation by sending moisture away from the skin to the surface of the fabric, where it quickly evaporates.

The term Giza cotton refers to the extra long staple cotton grown in Egypt and favored for the luxury and upmarket brands worldwide. The humid conditions and rich soil in Egypt along the Nile River Valley create the perfect conditions to grow long cotton fibers. The staples of Egyptian cotton can range from 1 1/2 inches to 2 1/4 inches.

The long length of Giza Cottons (about twice the size of other cotton fibers) allows them to be spun into very fine yarns. These yarns are soft and lustrous yet are very strong and durable. It's high absorbent ability allows it soak in dyes that give the final product very vibrant color that lasts longer than some other cotton products.

100% Giza Bed Linen

100% Organic Bed Linen

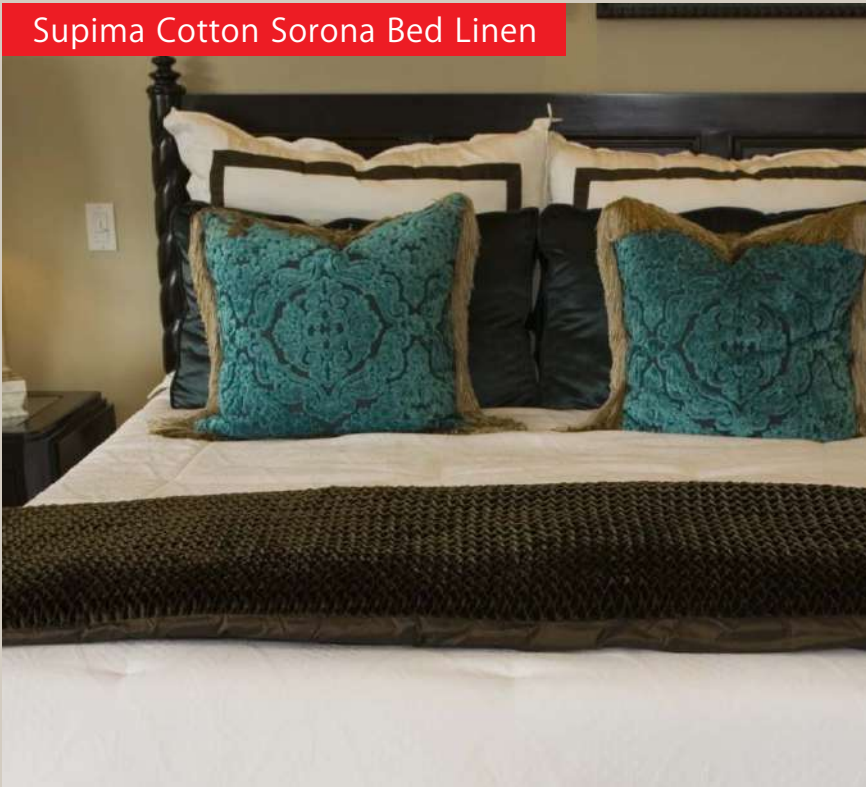

Organic cotton is grown in an environment where no pesticides, chemical fertilizers or herbicides have been used for a minimum of three years. Organic yarn spinners have set isolated processing areas in order to segregate the organic cotton from the conventional cotton. The dyeing and finishing of organic cottons also follows a strict procedure for chemical use in processing, eliminating all materials harmful to the body and the environment.

Sorona® is just one of the many products made available through biotechnology and the renewable materials pipeline. As a fiber, the properties of Sorona® differ from other existing fibers combining many of the best benefits into a single product. One of the best features of Sorona® is its flexibility and adaptability to provide benefits in a wide range of end uses. Fibers from Sorona® can be blended with any other fiber-natural or man-made cotton, linen, spandex, nylon or polyester.

Supima Cotton Sorona Bed Linen

Cotton Pure Silver Bed Linen

X-STATIC® is made by permanently bonding 99.9% pure metallic silver to the surface of the fiber. Not a nanotechnology or a complex chemical formula, just natural silver.

X-STATIC® fibers and fabrics deliver 100% surface area of silver to maximize performance, yet they remain soft and flexible.

X-STATIC® is registered as an antimicrobial with the US EPA, is Oeko-Tex Standard 100 certified and is used in dozens of FDA approved products.*

Cotton Fluorescent Bed Linen

Pure cotton is much more supple and smooth to the touch than those made from cotton blend. 100% cotton sheets withstand years of washing, unlike their combo counterparts, which tend to break down over time.

Fluorescent Bed Linens are manufactured from 100% superior qualitative cotton fibers. These Fluorescent Bed Linens are offered in variety of designs, sizes and colours.

Cotton Bamboo Lyca Stretch Bed Linen

Trademark of INVISTA

LYCRA branded fibers and fabrics help the world look better, move better, feel better.

LYCRA® fiber is a man-made elastane fiber. Never used alone, but always blended with other fibers, it has unique stretch and recovery properties. LYCRA® fiber adds comfort, fit, shape retention, durability and freedom of movement. This is achieved thanks to the unique properties of the fiber, which can be stretched up to seven times its initial length before springing back to the original position once tension is released.

Any natural or man-made fibers can be mixed with LYCRA® fiber.

Sustainable products

Organic Cotton Fabric

Of all organic fibres, organic cotton is one of the most popular. We also use sustainable fabrics like bamboo, soy and hemp. As shelter apparel we use regular cotton. We use all organic and sustainable products because it is environment friendly and the fabric also feels amazing besides having many great properties.

Organic Cotton Fabric uses natural fertilizers and pesticides which makes it a perfect skin care and nature care fiber. The weaving of Organic Cotton involves strict adherence to environment safety. Organic Cotton Fabric weaved by Balavigna Weaving Mills is recognized for its quality. Also we have been certified by various agencies that certify that no synthetic material has been used in manufacturing the fabric.

Green Initiatives

Balavigna Weaving Mills holds the prestigious iso 9001:2008 certification. We are also certified for the past 10 years by TUV Nord, Germany & 5"5" Japanese System, ETI, GRS, GOTS, BCI, OE 100 Blended certified by Control Union Certifications. Also, our yarns are accredited by Lycra, COOL MAX, EKO sustainable textiles, DOW XLA, Birla Cellulose Modal, Egyptian Cotton, Supima Cotton, Dupont Sorona, Lenzing Micro Modal, Pro Modal, Bio-RE Cotton and BCI Cotton.

Balavigna Weaving Mills, a company driven by the motto of "Quality is the soul of life", has from time to time incorporated the best machinery, invaluable experience and the desire to provide quality in its work.

Following are a few reasons why Balavigna Weaving Mills could be a top priority:

- Constantly renovated machines keeping track with the changing trends.
- Because we "NEVER" compromise on quality, quality is our identity.
- An experience of 20 years in textile industry.
- Organic fair trade and blended fabrics.
- Use stringent quality parameters.
- We have earned the best certifications in recognition of our motto.

Certificates obtained

Corporate Social Responsibility

Arul Jothi Vallalar Higher Secondary School

We at Balavigna Weaving Mills realize that education has a vital role in the formation of a nation. Thus we operate our school to make an effort to contribute to the society through education. We have been the pillar of support for various charitable trusts and educational institutes generating quality education. Around 700 students have been receiving highly subsidized education through these trusts every year. The school since its inception is being managed by our Managing Director.

Also we have strengthened the stand of women in the society by giving them career options and education. Our school helps to realize the dream of education for those families who could not study themselves. These people send their children to our school where they are received educated and transformed into good citizens.

Health and Safety Policy

Balavigna Weaving Mills are dedicated in providing safety and health environment for employees and customers, protecting the public and preserving company assets and our customer's property. Our most valuable resources are the people who work for us, to achieve this objective issue, an effective health and safety programme is been carried out through our organization. This programme will assist management and non-supervisory employees in controlling hazards and risk. It will minimize employee and customer's injuries, damage to customer property and damage or destruction of our company assets. This program is designed to encourage and to promote the safety of their fellow employees and customers. To accomplish our health and safety goals all members of management are responsible and accountable for implementing this policy. The policy of our company is to provide safe equipment, adequate tools and training and the necessary protective equipments. It is the employees to use the protective device which our company provides.

Making a difference by going beyond business

As a value-based and caring corporate citizen, our company inherently believes in the trusteeship concept of management. Our company is moving forward towards institutionalizing the concept of triple bottom line accountability represented by economic success, environmental responsibility and social commitment. Apart from women empowerment, our foot prints of social work extend to health and family welfare areas such as doctors visit at the time of illness, continued health care, first aid and safety training programs, awareness building, counseling, safe drinking water, sanitation, etc.
